

How To Transfer A Domain Out Of Nihce Builder

To transfer your domain out of Niche Builder you will need to login to your Niche Builder account and then to press the [USER SETTINGS] button on the top right corner (img1).

img1.

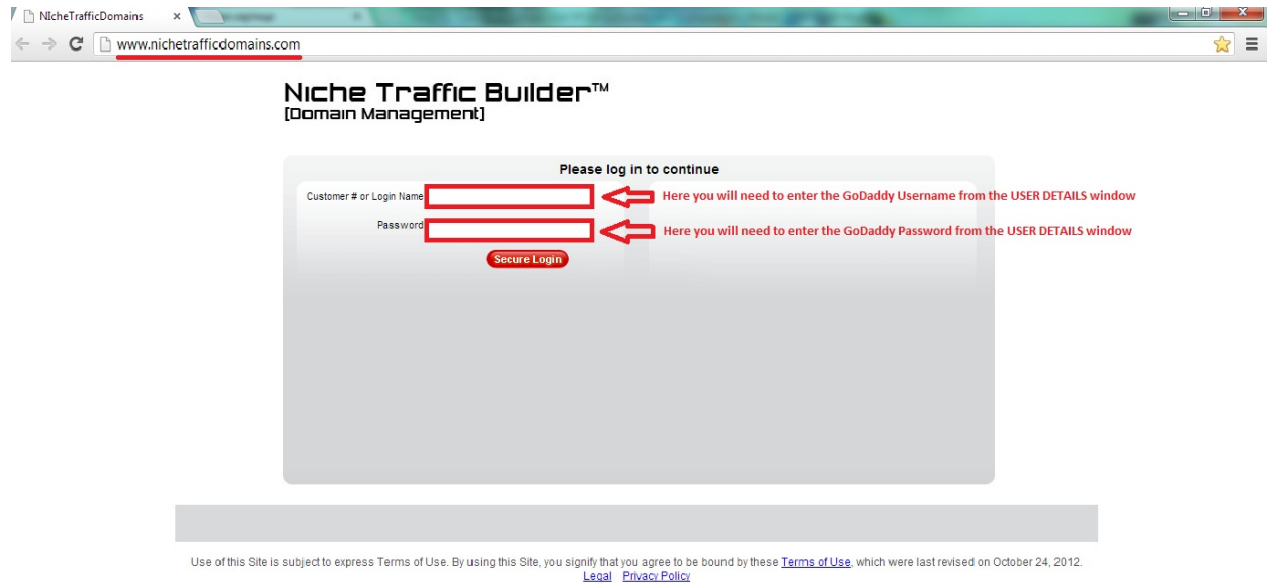

The USER DETAILS window will appear. On the bottom of that window you will find the GoDaddy Username and the GoDaddy password that you will need to use to login to your GoDaddy Domain Manager (<http://www.nichetrafficdomains.com>) account (img2).

img2.

You can press the link bellow and you will be redirected to the <http://www.nichetrafficdomains.com> (img2).

In the Domain Manager (<http://www.nichetrafficdomains.com>) you will need to use your GoDaddy Username and GoDaddy Password (img3).

img3.

If PIN is requested you will need to enter 3424

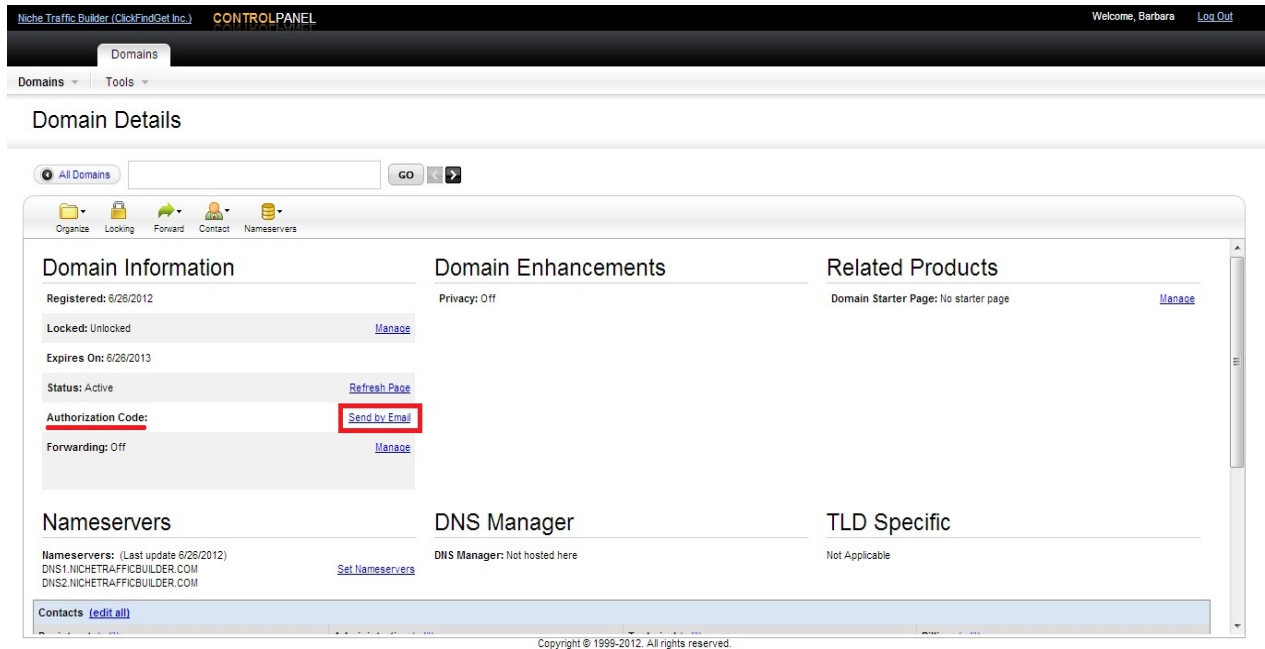

In GoDaddy Domain Manager you will need to unlock your domain(s) that you want to transfer.

You can do this by pressing on the domain that you want to transfer.

The Domain Details page will appear. Here you will need to unlock the domain by pressing the [Manage] link on the right side of the Locked text.

The Set Domain Locking window will appear and you will need to uncheck the checkbox next to the Lock domain (s) text and then to press the [OK] button.

You will also need the Authorization code that you can send to your login email address by pressing the [Send by Email] link on the right side of the Authorization Code text (img4).

img4.

The Authorization code will be sent to your email address which you are using to login to your Niche Builder account.

Now you can transfer your domain wherever you want.
